

Sponsor the world's densest air quality network

213m

Days of life are lost each year to disease from air pollution

8m

The global number of premature deaths each year

\$225bn

The staggering cost of air pollution globally

A revolution in technology to solve the air quality crisis

Introducing AirScape – the world's most accurate, real-time, hyper-local air quality network.

airscapeTM
by airlabs

AirScape is an unparalleled dense network of sensors, scientifically validated and calibrated to ensure that reliable information is available in real-time, at street level.

What's different about AirScape?

A working model in London proves the point

The initial installation of 250 award-winning sensors across the London Borough of Camden is sending data that has **100 times more spatial resolution**, and **refreshes 60 times more regularly** than the pre-existing network of air quality reference stations.

Hyper-local, real-time, reliable data platform

Extremely versatile and free to access, AirScape creates a picture of the city, making it easier to pinpoint the most problematic sources and address them. And in a level of detailed, real data that didn't exist until now.

Join us

Be at the forefront of fundamentally transforming how we monitor and manage air pollution.

Build your reputation in the fight against the air pollution crisis

Focus your strategy on solving the world's single biggest environmental health risk

Celebrate a positive initiative that has a clear and positive impact on our planet and humanity

Satisfy your stakeholders' demands for a sustainable ESG framework

To inspire and empower a generation to make informed quality-of-life decisions with accurate and reliable air quality data.

We believe clean air is a human right

At AirLabs we provide the most accurate air quality data to communities and decision-makers around the world to help them reduce air pollution exposure.

Pollution affects everyone, everywhere

Air pollution can make anyone seriously ill. We especially need to look after the young, the old and the vulnerable.

Let's use data to improve the quality of the air that we breathe. A collaboration of public and private enterprise to inform the everyday quality of life decisions for better outcomes of health, fairness and inclusivity.

Join our growing list of sponsors

in our mission to improve health and well-being in 200 urban spaces across the world.
